Phan Nguyen Anh Khoa

SOFTWARE ENGINEER

0562602721 khoaanh662004@gmail.com anhkhoa-dev.vercel.app Da Nang

PROFESSIONAL SUMMARY

Software Engineer with **8 months of hands-on experience** developing web applications using **ReactJS, Node.js,**. Skilled in **TypeScript, RESTful APIs, React Query**, and modern UI frameworks such as **MUI and Tailwind CSS.** Experienced in frontend-backend integration, **payment integration**, and relational databases including **MySQL** and **PostgreSQL**.

EDUCATION

Da Nang University of Economics AUG 2022 - JUN 2026

Major: Manangement Information Systems

GPA: 3.23/4.0

PROJECT

Hotel Booking & Management System (FullStack) DEC 2025 - MAR 2026

Tech stack: ReactJS, Node.js, MySQL | https://github.com/akhoa6204/booking-hotel

- Developed a fullstack **Hotel Booking & Management System** supporting room availability search, online and walk-in booking workflows, promotion management, and operational modules for front desk and housekeeping.
- Built responsive and intuitive user interfaces using **ReactJS and MUI**, improving usability across devices and enhancing the overall booking experience.
- Utilized **TanStack Query (React Query)** for server-state management, data caching, background synchronization, and reducing unnecessary API requests, improving application performance and responsiveness.
- Designed and implemented scalable **RESTful APIs** for booking management, authentication, room management, payments, and invoices.
- Implemented secure **JWT-based authentication** and **role-based access control (RBAC)** for administrators, receptionists, housekeeping staff, and customers.
- Integrated **SePay** to support online booking payments, handling payment request creation, transaction status verification, and booking confirmation after successful payment.
- Integrated **Cloudinary** for image storage and management, supporting efficient upload and retrieval of room images.

E-Commerce System (Full Stack) FEB 2025 - MAY 2025

Tech stack: Django, SQLite | https://github.com/akhoa6204/e-commerce-system

- Developed a full-stack E-Commerce System for mobile phone sales using Django and SQLite.
- Built separate Client and Admin portals for product browsing, sales management, and administrative operations.
- Implemented product and category management features, supporting efficient inventory organization.
- Developed secure session-based authentication and authorization for administrators and customers.

EXPERIENCE

XinkGroup MAY 2025 - JAN 2026

Intern Software Engineer

- Developed responsive and user-friendly web applications using **ReactJS, Next.js, TypeScript, Tailwind CSS, and Material UI (MUI).**
- Utilized **React Query** for data fetching, caching, and synchronization, reducing unnecessary API requests and improving application responsiveness.
- Integrated **RESTful APIs** with **Axios**, implementing authentication token management, request/response interceptors, and centralized error handling.
- Contributed to backend development using **Node.js and Express.js**, building and maintaining RESTful APIs following modular architecture principles.
- Implemented **JWT-based authentication** and **role-based access control (RBAC)** across both frontend and backend systems.

SKILLS

Frontend	ReactJS, NextJS, TypeScript, MUI, Tailwind CSS
Backend	Node.js (Express)
Database	MySQL, PostgreSQL
Tools & Platforms	Git/GitHub, Postman
Others	RESTful API Development, Authentication (JWT), RBAC, API Testing, AI Tools for Development, Intergration SePay webhook, VNPAY sandbox

CERTIFICATIONS

TOEIC Listening & Reading Score: **590** (2026)
